

# Open Innovation Products and Services

July 2021

## Level 1:

### Technology Assessment

Technology Assessments offers innovation leaders the opportunity to learn about existing and emerging technologies within a technical field or industry. Delivered as a written report (~15 pages), the analysis covers the underlying science, technical competitors and Rhizome Network's perspective on innovation gaps with current solutions. Includes two calls with the network expert (scoping and delivery).

Duration	Resources
~4 weeks	1-2 Innovators

### Market Assessment

The Market Assessment offers innovation leaders the opportunity to learn about Market-based technologies. Delivered as a written report (15-20 pages), the analysis covers the high-level market/technology dynamics, competitors and Rhizome Network's perspective on benefits and weaknesses of technology leading to overall market adoption. Includes two calls with the network expert (scoping and delivery).

Duration	Resources
~4 weeks	1-2 Innovators

### Technology Diligence

Tech diligence offers independent analysis and evaluation of a defined technology that considered technical viability, competitiveness, scalability, and execution risk. The output is a 5-10 page report, often includes one 30-minute call with the network expert to discuss diligence findings.

Duration	Resources
~3 weeks	1 Innovator

### Talent Scouting

Many teams need access to expertise and talent outside of their own personal networks. This talent is needed to support brainstorming initiatives or consultations where deep industry or technology expertise is required for a short period of time. Rhizome Network's Talent Scouting program includes recruiting candidate network members, presenting at least three qualified Rhizome Network members, and the first month of services (Network Member payment inclusive).

Duration	Resources
4 -8 weeks	1 Innovator
